Subject: Miami based company scamming and stealing US Government funds

Dear Honorable Deputy Piro,

Texas Medical Technology is a US manufacturer of PPE based in Houston Texas which employs hundreds of refugees, veterans and disable veterans.

We have received an order by several states and by other US government agencies to supply self covid test. We have received US government funds and wired about \$2M USD to Deramcare packaging / Acob labs (representation of chinese manufacture) to provide Covid tests kits to the US government.

After 5 weeks we haven't received the products yet and we incurred as well as the government damages of tens of millions of dollars. More important schools kids in the State of Delaware are suffering from not having these kits. Acon labs as well as Dermacare is risking the lives of hundreds of thousands of our kids by not providing these kits.

If you could assist in this matter I would appreciate it very much

Sincerely yours,

Omri Shafran, CEO
